DOC. MICRO. SER.

Chief of Station, Vienna

Attn:

Chief of Base, Munich

25 March 1958

INFO: Chief, EE

Attn:

Operational/GRARB

Suggested ARB Activity

1. Following the turnover of agents to case officers [] and [] to be completed by the end of April 1958 (see EGMA-31910, 5 February 1958 for details), [] believes the activities as listed below should be carried out by the Austrian Rear Base.

2. Completion of wartime communications arrangements with each agent to include:

a. (for personal contact) - an emergency oral signal, consisting of a fictitious name and actual address in agent's home town.

b. (for commo without personal contact) - one, and preferably two, dead drops in agent's home town, the first to be selected and reported on by case officer.

c. primary and alternate wartime rendezvous points to be given to each agent - primary in Innsbruck and alternate in Imst - with time schedule for agent's appearance there and recognition signal for agent to display at the rendezvous point. Contactor to use emergency oral signal at rendezvous point; probably only the name part will be secure or appropriate.

d. discuss with certain agents their wartime relocation in areas outside their present area of residence (as suggested by [] of the Vienna Station in January 1958). If agreeable with each, then discuss his reconnaissance of the selected area to determine (a) safehouses (b) people to assist (c) dead drop and contact point facilities there. The agents to be consulted in this matter are:

- Box: 7
JOB # 65-8012
Classification: 6-124-27/3
Folds: 4
- (1) GRIMPASTE (W/T) - to Area #3
 - (2) GRREPAIR-16 - to Area #3
 - (3) GRAVIMETRY-4 (W/T) - to Area #6
 - (4) GRREPAIR-3 - to Area #7
 - (5) GRREPAIR-1 (W/T) - to Area #7
 - (6) GRREPAIR-11 - to Area #8
 - (7) GRICE-1 (W/T) - to Area #8

DEC 18 1958

2 11 50 AM '58

In addition to the requirement that each of the above agents locate reliable persons and places in his new area, the four W/T operators in the above list will require cached W/T sets in the new area.

3. Training of all agents, including W/T operators, in tradecraft and PM matters necessary to their anticipated wartime position; i.e. security, clandestine communications; air reception, etc.

4. Simultaneous with #3 above, the replacement as necessary of Organizers and W/T Operators in certain areas. Positions to be replaced are:

- a. W/T operator for Area #3 - in place of GRIMPASTE.
- b. Organizer for Area #3 - in place of GRREPAIR-16.
- c. W/T operator for Area #6 - in place of GRAVIMETRY-4.
- d. Organizer for Area #7 - in place of GRREPAIR-3.
- e. Organizer for Area #8 - in place of GRREPAIR-11.

The above five agents, who will now be requested to plan on moving to another UW area in wartime (as a temporary expedient and known as such only to the case officer), should be replaced in these temporary assignments as soon as possible because it is felt that it will be both more secure for the agent and efficient for our purposes to allow each to remain in his own home area when war comes. [] believes the general difficulty of wartime movement, the possibility that the agent could not establish himself in the new area despite prior arrangements, and the possible suspicion such a move may arouse in the authorities are all reasons for not adhering to an agent's physical re-location any longer than it will take to obtain a resident replacement. Once the replacement is obtained, the agent can be instructed that the area removed from his home is to be considered his alternate area of activity.

5. Once the emergency communications arrangements and sufficient training have been concluded, contact with the following agents should be reduced to twice yearly: GRBLAMED-4, GRBLAMED-21, GRBLAMED-23 and GRREPAIR-4. As soon as replacements are obtained for GRREPAIR-3, GRREPAIR-11 and GRREPAIR-16, and emergency communications and training completed, contact with these three agents should also be reduced to twice yearly. If contact with these seven agents is reduced, then the question of salary becomes a problem. [] believes the best solution to be a cancellation of all monthly salary payments and the presentation, at the meeting preceding Christmas, of one month's salary (the amount the particular agent now receives) as a Christmas gift. This contact plan will eventually leave only the Organizer-W/T Operator teams to be contacted as frequently as before.

6. As the ARB continuing effort, Organizers will receive periodic refresher training in the subjects they should know, W/T Operators will be trained and refreshed periodically, emergency communications signals and facilities of both Organizers and W/T Operators will be tested and inspected and names of reliable persons in each UW area will be obtained, name-checked, and filed for possible wartime contact.

7. Attached are three charts; the first identifies ARB's personnel by UW area location today, the second shows the expected wartime distribution and the third is a personnel assignment table. The seven agents with whom we will now

discuss a wartime transfer to other UW areas are identified by a (T) on Chart #1. The six of these seven agents who, [] feels, should be replaced in time and retained in their home areas are identified by an (R) on Chart #2. The seven agents who eventually should be reduced to twice-yearly contact are marked with a (2) on Chart #2. Also on Chart #2, an (E) identifies those four agents, all P/As, whom [] believes should evacuate Austria in wartime.
